

Toxic Politics Are Assaulting our Health by Weakening our Water Protections

Big business and Fossil Fuel Companies \$\$\$\$ Prioritized over Salmon, Orca, Humans, Mother Earth

WASHINGTON STATE WATER QUALITY STANDARDS THROWN INTO THE CHIPPER & SHREDDER. THERE ARE OVER 100 RULES BEING ROLLED BACK BY THE TRUMP ADMINISTRATION.

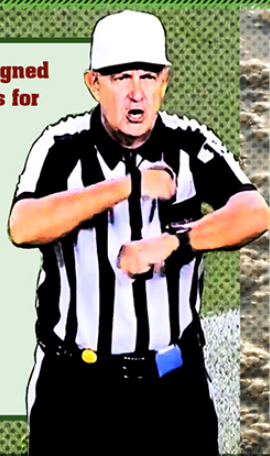

More Toxins More Cancer

Water, Salmon, Orca, Humans, Mother Earth POISONED by Rule Change

Their Dirty Play Book is designed to break rules and guidelines for revocation of rules.

- ☒ Failure to Consult with Tribes
- ☒ Failure to notify the Public
- ☒ Failure to Recognize Science

3 years ago Washington State began implementing the most protective water quality rule in the nation to protect human health and our seafood.

This roll back will weaken protections against toxic pollutants and will allow more known toxins into our waters and food.

- ▶ Dioxin is reclassified as a non-carcinogen
- ▶ Polychlorinated biphenyls PCB discharge less restrictive

Puget Sound Salmon already have higher concentrations of contaminants, such as PCB's, than other salmon from other parts of the Northwest.

It will take all of us working together to protect Puget Sound and all of our Waters

We should expect to be protected, NOT having our health traded for short-term economic and corporate gains.

What Can You Do?

Speak out and support the Washington State Department of Ecology and Governor Inslee in pushing back against this toxic federal rule!
